Total
Recorder V5.2
Released!
May 24, 2005

Copyright
 High Criteria Inc 2005

High Criteria Products

Product	Description
Total Recorder Standard Edition	Total Recorder Standard Edition records streaming audio and sound card inputs. Recordings are saved to the hard-drive in .wav (compressed or uncompressed), wma, mp3, FLAC and Ogg formats. Convert different sound formats to .wav, wma, mp3, FLAC and Ogg.
Total Recorder Professional Edition	Total Recorder Professional Edition retains all of the features of the Standard Edition, but also implements additional features for serious recording enthusiasts. For a limited time, registered users of the Standard Edition may upgrade to the Professional Edition, by paying an upgrade fee.
Total Recorder Audio Restoration Add-on	The Audio Restoration Add-on can be used to remove distortions such as clicks, crackles, and background noise, and provides high-quality restoration of audio recorded from LPs, tapes and microphones.
Total Recorder Automatic Gain Control (AGC) and Speech Enhancement Add-on	The AGC and Speech Enhancement Add-on will provide various enhancements to recordings of the spoken word.
Total Recorder Spectrum Analyzer and Graphic Equalizer Add-on	The Spectrum Analyzer and Graphic Equalizer Add-on lets you display and modify the levels of different sound frequencies. For example, you can use the Graphic Equalizer to set sound frequency levels, and then use the Spectrum Analyzer to review the results.
Total Recorder Developer Edition	Total Recorder Developer Edition allows software developers to access Total Recorder controls and functions, through OLE Automation and integrate sound recording with your own applications.
Liberty Court Recorder	The Liberty Court Recorder provides multi-channel recording capabilities that are ideal to record courtroom proceedings. Multiple audio sources are recorded on separate channels. The channels may be played back together or separately using the no-cost Liberty Player.
Transcription Buddy	Use a PC to transcribe audio files with Transcription Buddy. Control audio playback, while you transcribe. Playback may be controlled with an available foot pedal or through the keyboard.
Phone-In Buddy	Call-in system that allows users to call into a PC and leave dictation or reports. Ideal for doctors, lawyers, police departments or other applications requiring a central dictation system.
Dictation Buddy	Records telephone conversations or standard microphone or Line-In input and saves them as a compressed sound file that you can re-play, edit, email, or publish.
Personal Info Keeper	Stores your private information in a repository and allows you to instantly "drag and drop" commonly used data into HTML forms and Windows applications. Great for managing passwords and commonly accessed account information. Secure and easy to use.
File Alert Monitor	File Alert Monitor provides alerts about the creation, update or deletion of files in specified folders. Alerts may be in the form of a pop-up Window or an audio alert. Folders may reside on the local PC or a networked drive. File Alert Monitor is a freeware application provided by High Criteria.
Out-Of-Date Monitor	Out-Of-Date Monitor is a Windows program used to monitor folders for files that have become out-of-date. It can also be used to monitor a drive for a minimum amount of free space. Out-Of-Date Monitor is a freeware application provided by High Criteria.
